Hi Tom,

Our meeting notes:

- Niranjana will release the Linux AMI in dev baseline account the next bi weekly release which is **March 12th IDC time**
- Eric will validate the Dev AMI on the **12th of March PST time** and manage the communication on the release of the dev AMI with the customers
- Once customers validate the Dev AMI Eric will release AMI from Prod baseline account on the **14th of March 2019**
- Eric will validate the AMI in prod and manage the communicate on the release of the production AMI with the customers
- IDC will continue to release the Dev AMI from development baseline account for a couple of cycles and finally take over the release of AMI in production on **April 16th**
- We will evaluate any new requests to add agents to AMI baseline on a case by case basis but push back if it is not enterprise wide
- We will test any enhancements in the Dev baseline account before releasing it to prod
- CET team will continue to support via #team-gbs as majority of the user base is in US and IDC will support during IDC time

Please let me know if I missed anything

Regards

Harendra
